Profile

Hello World.

I am a motivated and creative individual, a painstaking web and games developer, and a fast-learner. Apart from my passion for video games, I can successfully label myself as a keen problem-solver when it comes to programming and logic. I am confident that with my passion for technology, I could be an asset to any company related to my fields. My strengths lie in my problem-solving techniques, leadership skills, and a keen eye for detail.

Education

Sep 2015
Jan 2017
MSc with Distinction in Computer Games Technology
Institution: City, University of London (London, UK)

Sep 2009
